HEARTH PRODUCT REMOTE CONTROLS

SKYTECH // SKY-1001-A HEARTH REMOTE AND THERMOSTAT

Enjoy the ambiance of a cozy fire and benefit from the convenience of a on/off remote. Relax while using this fireplace remote control from Skytech.

Features:

- **Convenient Design** - The battery powered R.F. transmitter gives wireless remote control to a gas fireplace
- **Battery - Operated Design** - Battery powered receiver with learn function, snap-on wall plate, and 18" wires with connectors
- **For Use With** - Receiver box is designed for millivolt gas valves only and acts as a dry contact switch (the receiver will not output any voltage)

Includes - Transmitter remote, receiver box, wall clip, wires with connectors, batteries, and instruction manual.

SKYTECH // SKY-3301 HEARTH REMOTE AND THERMOSTAT

Skytech 3301 features a timer and thermostat, giving you optimal, customizable wireless control.

Features:

- **Convenient Design** - The battery powered R.F. transmitter and receiver give wireless remote control to a gas fireplace
- **Easy to Use** - 4-Button ON/OFF/TIMER/SET transmitter provides simple control of a connected fireplace
- **Easy to Read** - Crystal clear LCD screen displays room temperature in degrees Fahrenheit or Celsius
- **Timer Control** - Timer feature allows the user to set a desired amount of time the fireplace will operate
- **Simple Setup** - Battery powered receiver with learn function, snap-on wall plate, and 18" wires with connectors has 20' range and can learn up to (2) additional Skytech remotes
- **For Use With** - Receiver box is designed for millivolt gas valves only and acts as a dry contact switch (the receiver will not output any voltage)

Includes - Transmitter remote, receiver box, wall clip, wires with connectors, batteries, and instruction manual.

SKYTECH // SKY-3002 REMOTE

This SkyTech 3002 Remote is compatible for use with gas fireplaces that have millivolt valves and electronic ignition systems. With its limited lifetime warranty, you'll enjoy the ease that this remote system brings you for many years to come.

Features:

- 24 hour clock
- 9 hour countdown timer
- LCD screen displays room and set temperatures
- Limited lifetime warranty
- Over one million programmable security codes

DIRECT-VENT & VENTED SPACE HEATERS

MODEL#	HEAT OUTPUT
EX38CTWP	36,500 BTU

- **Consistent, Even Heating:** Unique technology monitors room temperature, adjusting within seconds to maintain the pre-set temperature
- **Reduced Cold Spots:** A variable speed blower circulates warm air evenly throughout the room for consistent warmth—even in corners
- **Efficient Technology That Saves Energy and Money:** Rinnai technology uses only the exact amount of gas needed, optimizing energy efficiency
- **Complements Existing Heating:** Rinnai EnergySaver® Direct-Vent Wall Furnaces come in multiple sizes and can be used to supplement existing heating systems
- **Features to Ensure Reliable Performance:** The reliable low-maintenance products feature a durable stainless-steel heat exchanger and the assurance of proven engineering
- **Fast Installation:** No ductwork means easier installation

Rinnai offers a 10-year limited warranty on the heat exchanger. There is also a 5-year warranty on parts and a 2-year warranty on labor.

KOZY HEAT // LAKEFIELD XL

Because the free standing gas fireplaces that we offer are direct vent, there's no need for a chimney or traditional fireplace in which to install them. A direct vent model can connect to the exterior of your home through venting, allowing outside air to circulate around the firebox. This opens up a wealth of possibilities for location, enabling energy-efficient warmth in almost any room of the house. Even homes that weren't originally constructed to accommodate a gas appliance are often suitable for the installation of a free standing gas fireplace.

Features:

- Viewing Area: 16" x 22"
- 39,000 BTU/hr Input - LP
- Ceramic Glass
- Standard Traditional Legs
- Patented Burner & Log design
- Limited Lifetime Warranty

EMPIRE // RH-35 & RH-50

Heat large areas economically with Empire's vented room heaters. With this efficient B-Vent heat flow, the durable RH-35 & RH-50 models offer ample warmth to make any room comfortable. The one-piece glass enclosure on the RH-50 allows you to see the flame as it heats, while the optional ceramic logs add visual interest. The closed front on the RH-50 easily fits any décor. An optional internal blower (DRB-1) can be purchased separately for added circulation.

MODEL#	HEAT OUTPUT
RH35LP	35,000 BTU
RH50CBLP	50,000 BTU
RH65BLP	65,000 BTU

VENT-FREE SPACE HEATERS

RINNAI // VENT-FREE SPACE HEATER

For rooms that are hard to heat, Rinnai Vent-Free Fan Convector are the perfect solution. They incorporate a convection fan that evenly distributes warm air throughout the space, providing comfort even in faraway corners. Temperature output control maintains efficiency when heat isn't needed. By eliminating vents or ducts, places where heat typically gets lost, virtually all the warm air gets delivered to the room—making for a solution that's 99.9% efficient. In fact, the Rinnai Vent-Free Fan Convector is one of the most fuel-efficient heating products on the market today. Using either natural gas or liquid propane fuel, it can significantly reduce energy bills.

Features:

- Supplemental/Zone Heating
- Oxygen depletion sensor (ODS)
- User-friendly controls
- Modulating technology
- Versatile installation options
- Pushbutton electric ignition

MODEL#	HEAT OUTPUT
FC510P	10,000 BTU
FC824P	22,000 BTU

Rinnai FC824P Shown

HEARTHRITE // BLUE FLAME

Blue Flame heaters warm the air, which rises to create natural circulation in the room, making this ideal for any supplemental heat application. Includes a factory standard ODS. This model features optional feet and blower, sold separately.

MODEL#	HEAT OUTPUT
HBW10TL	10,000 BTU
HBW20TL	20,000 BTU
HBW30TL	30,000 BTU

HEARTHRITE // RADIANT HEAT

These heaters project warmth into the room, like sunlight through a window. With three different sizes, these are ideal for any supplemental heat application. Includes a factory standard ODS.

TANKLESS WATER HEATERS

RINNAI // TANKLESS WATER HEATER SERIES

THE SMART CHOICE IS THE #1 CHOICE

Rinnai's commitment to quality has made them the #1 selling tankless water heating brand in North America. Foster Fuels features Rinnai as our top water heater brand.

- Put worrying about hot water out of your mind
- More space for you
- Family-friendly, earth-friendly
- Save on energy while boosting your home's value

KEY FEATURES:

- Delivers an endless supply of hot water.
- Only heats water when it's needed.
- Compact size saves roughly 12 ft² of floor space.
- Saves more than \$150/year in energy costs when compared with typical electric storage water heaters.
- Produces 50-60% lower CO₂ emissions when compared with electric storage tank systems.
- May qualify for tax credits and rebates.
- Wi-Fi Technology

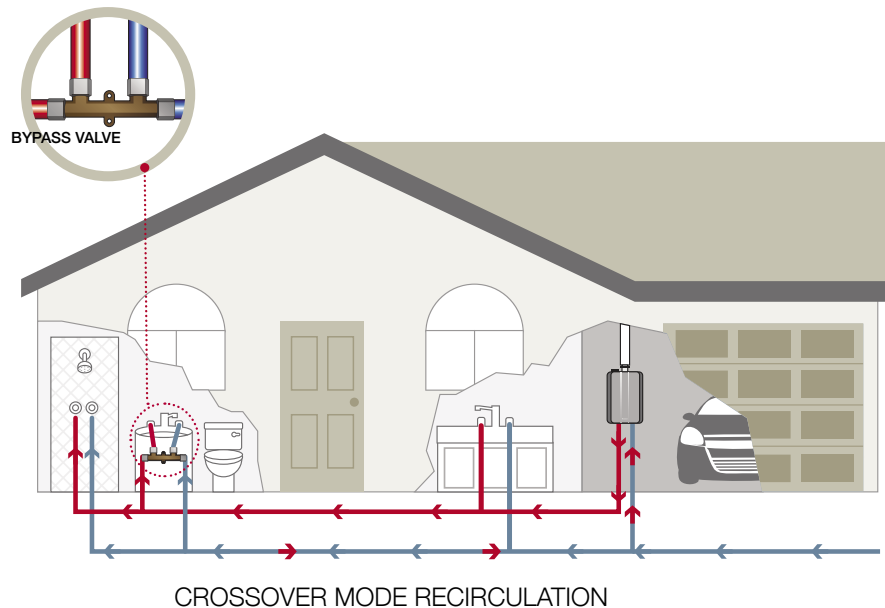

MODEL#	FLOWRATE (MAX)
RU160IP	9 GPM MAX
RU180IP	10 GPM MAX
RU199IP	11 GPM MAX

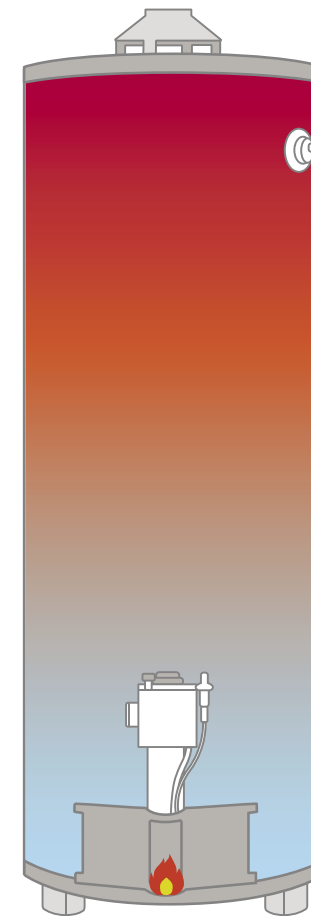

FASTER HOT WATER // HOT WATER ON YOUR SCHEDULE

Many Rinnai tankless models come standard with recirculation technology, a built-in feature that lets you activate recirculation during times of high hot water demand.

You can activate recirculation with smart home devices, push button technology, or with motion sensors that detect when family members are present. Both connect to your system wirelessly to trigger recirculation only when you need it.

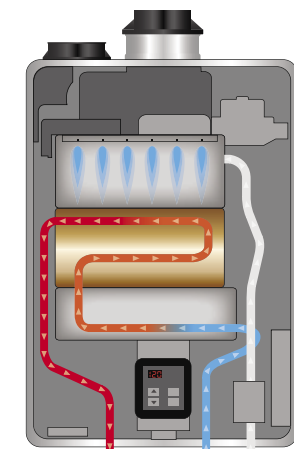

INEFFICIENT ELECTRIC TANK WATER HEATER

- Limited capacity means limited hot water supply
- Wastes energy by heating water again and again, whether you need it or not
- Failure often means leaks, which can mean costly damage

TANKLESS WATER HEATER

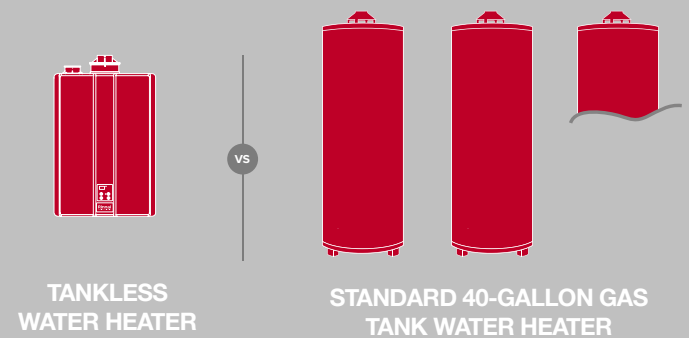

HOT WATER OUTLET
COLD WATER INTAKE
GAS INTAKE

- Delivers endless supply of hot water
- Heats water only when you need it saving significant energy costs
- Lasts 2x longer than a tank and has lower repair costs
- Frees up more space in your home

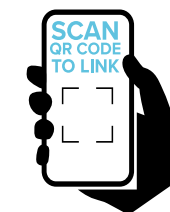

VS

The lifespan of one Rinnai Tankless Water Heater compared to the lifespan of a traditional tank water heater.

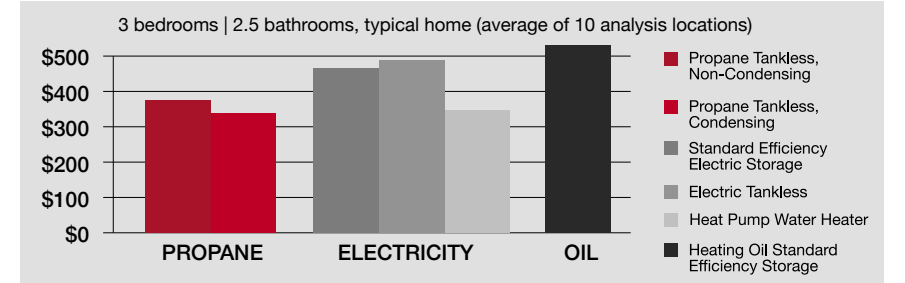

ENERGY CONSUMPTION & COST

Given Energy Factors as high as 0.99, propane tankless systems operate very efficiently, and therefore have relatively low fuel consumption and costs. The bar graph (right) illustrates that propane condensing tankless systems save roughly \$150-200/year compared with typical electric storage water heaters or heating oil systems.**

Check out this video

ANNUAL ENERGY COST FOR WATER HEATERS

ENERGY EFFICIENCY: A propane tankless water heater transfers propane's thermal energy into hot water by up to a 0.99 Energy Factor (EF).*

TANK RENTAL PROGRAM

Don't want to pay the money up front for a new tank? Foster has the program just for you. Underground or above-ground, our tank rental program has got you covered.

Our propane tank rental program offers a convenient, cost-effective solution. Rent an above-ground or underground tank at competitive rates and with no long-term commitments. We'll also handle the installation, inspection, and filling of your tank, removing the burden from your shoulders.

GAS CHECK® YOUR SYSTEM

Do you think that you burn too much gas? Do you think you may smell propane? If so, the safety of your family may be at risk. As your trusted propane supplier, Foster Fuels offers GAS Check™ by our certified technicians.

GAS CHECK® INCLUDES:

- Tank Inspection
- System Leak Inspection
- Regular Visual Inspection
- Customer Awareness Information
- Odor Testing
- Pressure Testing
- Appliance Inspection

COMMON TERMS & PHRASES

- BTU** British Thermal Unit is how heat output is measured. It is the amount of heat required to raise the temperature of one pound of water by one Fahrenheit degree.
- Direct Vent** Fireplace system that uses a direct-vent combustion system. This is a sealed-combustion system which the air for combustion is drawn from the outdoors and waste combustion gases are exhausted into the outdoors.
- Vent-Free** Fireplace system that does not need venting to operate. They are made to burn cleanly. This system is 99.9% efficient. It creates less pollution and slightly less gas consumption.
- Vent-Free Log Sets** Reproduction of real wood logs that are heater rated appliances that simulate the look of a real wood fire.
- Vent-Free Firebox** Install this system wherever you want it. Designed to be installed and operated without a chimney, flue or vent and can be installed somewhere it would be otherwise impossible to install a vented fireplace. Finish the look with your favorite set of vent-free gas logs.
- Fireplace Insert** These are direct vent or vent-free appliances or inserts for an existing wood-burning fireplace.
- Vented Gas Logs** Used in a fireplace that is capable of burning real wood and must be burned with the damper of the fireplace open. This type of gas logs create exhaust (similar to a real wood fire) that must be vented through the damper. These log sets create a very realistic flame pattern that look like a real wood fire.
- Space Heater** A smaller heater that can be free-standing or attached to a wall. Used as a supplemental heating source to heat a room.
- Tankless Water Heater** An alternative to a traditional hot water heater that supplies on-demand hot water by warming as it flows through the small, compact device. Very efficient and space conserving.
- Tiki Torch** An exotic and unique outdoor light source used to enhance the outdoor space and protect against insects and other outdoor pests.
- Gas Lights** Used as an outdoor light source that provides a timeless and classic look to an outdoor space.
